ACADEMIC PROJECTS

ForHer

- ForHer is a women safety app where women can send their current location to their guardians and police when they feel insecure and in danger just by shaking the phone or clicking the send location button. There is a separate Login page for police to see the recent requests that contains the user's image, name, location, and contact number.
- Android Studio, Java, Google Firebase.
- Selected as one of the best projects in Bennett University(June 2021) and shortlisted for the industrial Project Expo.**

Wildfire prediction

- Wildfire prediction is a machine learning project to predict wildfires in the near future.
- Python.

Farm Share

- Farm Share is an android app developed to help farmers overcome the problem of lack of machinery or agricultural equipment. Lessee (farmers who cannot afford to buy agricultural equipment) can take equipment as rent from Lessor (farmers who can afford to buy equipment) and pay them. So, in this way both the farmers get benefited.
- Android app: Developed using Android Studio, Java, Google Firebase.
- Currently developing a website using MERN stack.

Covid-19 Tracker App

- Covid-19 Tracker App is an android app to track the status of Covid-19 cases globally and nationally.
- Android Studio, Java, Retrofit.

SKILLS & LANGUAGES
