Shanmukh Chowdary Morampudi

Student at Bennett University

Over the years, I have acquired relevant skills and experience in various domains. I have also worked tirelessly on my communication abilities and teamworking skills. Even though I'm a fresher, I assure you that I will give my best so that I can contribute as much as I can towards the growth and welfare of this great organization.

PERSONAL PROJECTS

ForHer
- ForHer is a women safety app where women can send their current location to their guardians and police when they feel insecure and in danger just by shaking the phone or clicking the send location button. There is a separate Login page for police to see the recent requests that contains the user's image, name, location, and contact number.
- Android Studio, Java, Google Firebase.
- **Selected as one of the best projects in the university and shortlisted for the industrial Project Expo.**

Farm Share
- This is a project to help farmers overcome the problem of lack of machinery or agricultural equipment. Lessee (farmers who cannot afford to buy agricultural equipment) can take equipment as rent from Lessor (farmers who can afford to buy equipment) and pay them. So, in this way both the farmers get benefited.
- Android app: Developed using Android Studio, Java, Google Firebase.
- Website(currently on going): MERN stack.

Covid-19 Tracker App
- This is an android app to track the Covid-19 cases. It shows some major aspects like total cases, active cases, today's cases, total deaths, today's deaths, number of people recovered, and affected countries. This information is divided into 2 particular sections so that the user can keep track of the total cases worldwide and in a particular country.
- Android Studio, Java, Retrofit.

Hostel Management System
- This is a Desktop application used to manage Hostel Administration.
- Java NetBeans, Backend- MySQL.
